

Aim of the kindergarten

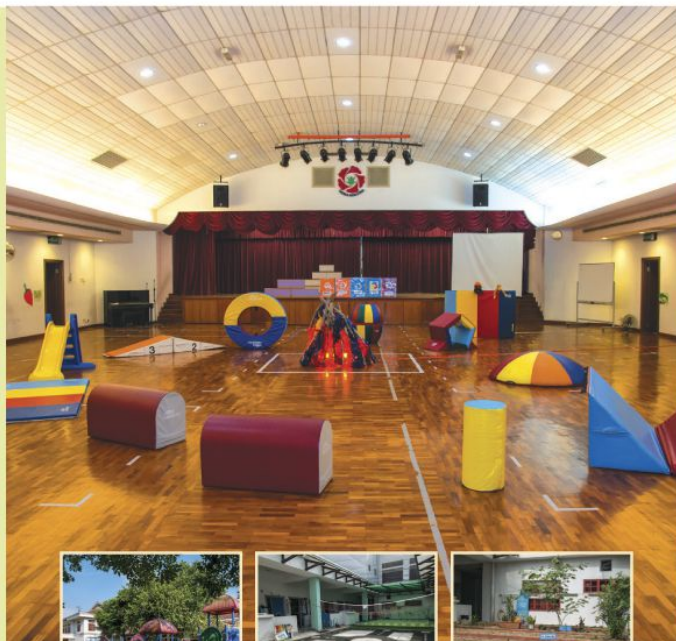

Tadika Seri Soka is founded upon the principle of humanistic education according to which the cultivation of strength, righteousness and liveliness, the value of humanity innate in each child, are our main objectives. We aim to foster a new generation of citizens who will contribute towards peace and prosperity of our country in the 21st century.

Our activities are aimed at developing the children's potential so that they become **wholesome, integrated and balanced individuals** in accordance with our National Education Philosophy. Through these activities, we hope to achieve healthy multiracial interaction, harmonious co-existence and unity.
